EXECUTIVE SUMMARY

Full Stack Vibe Coder and founder of **SwadDesh** with proven execution in architecting multi-portal web ecosystems, native **Flutter** mobile applications, **Java Spring Boot** microservices, and **PostgreSQL** persistence on **Supabase**. Focused on clean architecture, high-concurrency relational data models, and delivering production-grade software with sub-second performance.

TECHNICAL CAPABILITIES & STACK

Languages:	Java, Dart, TypeScript, JavaScript (ES6+), Python, C, C++, SQL, HTML5, Modern CSS
Frameworks & Mobile:	Spring Boot, Flutter, Next.js 15, React 19, FastAPI, Node.js, Express, Tailwind CSS, Framer Motion
Databases & Cloud:	PostgreSQL, Supabase (Row Level Security & Auth), JPA/Hibernate, Git, GitHub, Docker, Vercel, REST APIs

VENTURE LEADERSHIP & SYSTEM ARCHITECTURE

SwadDesh — Founder & Lead System Architect 2024 – Present | India

- Conceived, architected, and engineered a 4-portal regional food platform (Customer Storefront, Vendor Portal, Admin Workspace, and Agent Logistics Portal) with Next.js 15 and React.
- Engineered high-concurrency enterprise backend microservices in **Java Spring Boot** with Spring Security, RESTful APIs, and relational JPA/Hibernate persistence.
- Designed transactional **PostgreSQL** database schemas on **Supabase** with Row Level Security (RLS), ACID consistency, and automated triggers for batch inventory.

SELECTED PRODUCTIONS & BUILDS

SwadDesh Mobile Application (In Progress) Flutter, Dart, Java Spring Boot, Supabase

- Engineering a 60fps native cross-platform mobile app in **Flutter & Dart** for Android & iOS with offline catalog caching, smooth touch navigation, and 1-tap checkout.
- Integrated directly with the unified Java Spring Boot REST API and Supabase database for real-time order state synchronizations.

Grab — Modern E-Commerce Platform React, TypeScript, Node.js, Supabase

- Built a responsive e-commerce web application with reactive cart state management, dynamic product routing, and Supabase auth.
- Implemented secure server-actions, relational database schemas, and optimized transactional checkout flows.

Personal Digital Canvas — Cinematic Portfolio System Next.js 15, TypeScript, Tailwind, Lenis

- Engineered an Awwwards-grade luxury portfolio using Lenis momentum scroll physics and lightweight HTML5 Canvas particles.
- Features interactive 3D component physics, dynamic system architecture flowcharts, and 60fps responsive animations.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering Graduation: 2026 | India

Core Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, OOP in Java & C++.
